social work theories chart: *Applying Theory to Generalist Social Work Practice* Carol L. Langer, Cynthia Lietz, 2014-12-31 The social worker's guide to integrating theory and practice *Applying Theory to Generalist Social Work Practice* teaches aspiring social workers how to apply theory in real world practice. Fully aligned with the Council on Social Work Education's 2015 Educational Policy and Accreditation Standards, the book links theory to practice with clear, concise instruction including a discussion of evidence-based practice. Twelve commonly-used theories are thoroughly explained, with discussion of the strengths and limitations of each, and applied to real work with individuals, groups, families, communities, and organizations. social work theories chart: *Feminisms in Social Work Research* Stéphanie Wahab, Ben Anderson-Nathe, Christina Gringeri, 2014-07-25 Social work as a profession and academic discipline has long centered women and issues of concern to women, such as reproductive rights, labor rights, equal rights, violence and poverty. In fact, the social work profession was started by and maintained in large part by women and has been home to several generations of feminists starting with recognized first wave feminists. This wide-ranging volume both maps the contemporary landscape of feminist social work research, and offers a deep engagement with critical and third wave feminisms in social work research. Showcasing the breadth and depth of exemplary social work feminist research, the editors argue that social work's unique focus on praxis, daily proximities to privilege and oppression, concern with social change and engagement with participatory forms of inquiry place social workers in a unique position to both learn from and contribute to broader social science and humanities discourse associated with feminist research. The authors attend here to their specific claims of feminisms, articulate deep engagement with theory, address the problematic use of binaries, and engage with issues associated with methods that are consistently of interest to feminist researchers, such as power and authority, ethics, reflexivity, praxis and difference. Comprehensive and containing an international selection of contributions, *Feminisms in Social Work Research* is an important reference for all social work researchers with an interest in critical perspectives.

social work theories chart: *Re-Search Methods in Social Work* Kimberly A. Calderwood, Dr. Marina Morgenshtern, Dr. Kathleen E. Absolon (Minogizhigokwe), 2024-04-30 Written from a critical theory, de-colonizing, and transformative lens, *Re-Search Methods in Social Work: Linking Ways of Knowing to Knowledge Creation* brings together in one space an introduction to four worldviews that inform what we call knowledge gathering, knowledge construction, knowledge co-creation, or re-search (depending on the worldview). This text presents a broad range of methods that are commonly used to inform social work practice across Turtle Island/Kanata/Canada, including the steps from inception to knowledge mobilization that are typically followed to acquire knowledge across Indigenous, (post)positivist, interpretivist, and transformative worldviews. This engaging text features reader-friendly language; integrated authorship that spans the four worldviews; discussions of various challenges, strengths, and limitations in bringing together multiple ways of knowing and associated methods; chapter learning outcomes; and discussion questions. With a focus on anti-oppressive practice, social justice, social action, collaboration, and inclusion, *Re-Search Methods in Social Work* is essential for college and university social work courses, and for social work practitioner-researchers across Turtle Island/Kanata/Canada who are interested in opening their mind to a more wholistic and respectful way of engaging in dialogue about and advancing knowledge that leads to social change.

social work theories chart: *Child and Family Assessment in Social Work Practice* Sally Holland, 2010-11-15 This thoroughly revised and updated second edition of *Child and Family Assessment in Social Work Practice* is an essential guide for social work students and practitioners involved in the assessment of children and their families. Focusing on 'core' assessments and guiding the reader through the complexities of conducting assessments of need and risk, the book now includes within each chapter a range of specifically-tailored exercises and focus points which encourage readers both to reflect on what they have learnt and to understand how they can apply

that learning to practice. Placing a strong emphasis on good, evidence-based, assessment practice, Sally Holland has also, for this new edition, included original research evidence from a wide range of up-to-date research studies which are relevant to today's practice and which aim to promote a critical and reflective approach to the assessment process. The book is divided into three parts: - Part 1 explores different approaches to assessment work, outlining policy changes and their implications for working with children and their families. - Part 2 studies those involved in child and family assessments: children and their parents; and the relationship between the assessors and the assessed. - Part 3 - a more practical guide - outlines the actual process of an assessment, illustrated by case studies, focusing on planning assessment methods, analysis, reporting and critical evaluation. Accessibly relating theory and research to actual practice through the use of case studies, exercises, and suggestions for good practice and further reading, this book has a student-friendly structure. It will be an invaluable resource for practitioners and academics across the field of social welfare, particularly for those embarking on, or already involved in, child and family assessment.
