Introduction to Manufacturing Michel Baudin, Torbjørn Netland, 2022-12-27 This Introduction to Manufacturing focuses students on the issues that matter to practicing industrial engineers and managers. It offers a systems perspective on designing, managing, and improving manufacturing operations. On each topic, it covers the key issues, with pointers on where to dig deeper. Unlike the many textbooks on operations management, supply chain management, and process technology, this book weaves together these threads as they interact in manufacturing. It has five parts: Getting to Know Manufacturing: Fundamental concepts of manufacturing as an economic activity, from manufacturing strategy to forecasting market demand Engineering the Factory: Physical design of factories and processes, the necessary infrastructure and technology for manufacturing Making Information Flow: The central nervous system that triggers and responds to events occurring in production Making Materials Flow: The logistics of manufacturing, from materials handling inside the factory via warehousing to supply chain management Enhancing Performance: Managing manufacturing performance and methods to maintain and improve it, both in times of normal operations and emergencies Supported with rich illustrations and teaching aids, Introduction to Manufacturing is essential reading for industrial engineering and management students - of all ages and backgrounds - engaged in the vital task of making the things we all use.

Smart Grid and Internet of Things Yi-Bing Lin, Der-Jiunn Deng, 2021-03-05 This volume, SGIoT 2020, constitutes the refereed proceedings of the 4th EAI International Conference on Smart Grid and Internet of Things, SGIoT 2020, held in TaiChung, Taiwan, in December 2020. The IoT-driven smart grid is currently a hot area of research boosted by the global need to improve electricity access, economic growth of emerging countries, and the worldwide power plant capacity additions. The 40 papers presented were reviewed and selected from 159 submissions and present broad range of topics in wireless sensor, vehicular ad hoc networks, security, blockchain, and deep learning.

Mobile Computing, Applications, and Services Martin Griss, Guang Yang, 2012-04-23 This book constitutes the thoroughly refereed post-conference proceedings of the Second International Conference on Mobile Computing, Applications, and Services (MobiCASE 2010) held in Santa Clara, CA, USA, during October 25-28, 2010. The 15 revised full papers presented were carefully selected from numerous submissions. Conference papers are organized in six technical sessions, covering the topics of mobile Web and mash-ups, software engineering and development tools, cross-layer approaches,

location-based services, mobile healthcare, and mobile social networking. Furthermore the volume includes two workshops on mobile computing and mobile security as well as four poster papers.

Multichannel Marketing Ecosystems Markus Ståhlberg, Ville Maila, 2013-11-03 With dramatic changes in consumer behaviour - from online shopping to the influence of social media - marketers are finding it harder than ever to coordinate, prioritize and integrate the latest interactive channels into their overall brand-building strategy. Despite hard evidence showing the importance of digital marketing, the emphasis often remains on traditional media, with the most common social media channels being used without centralized coordination or integration with a wider marketing and branding campaign. Multi-Channel Marketing Ecosystems examines a fundamental game changer for the entire marketing industry - the seismic shift from a single TV-centric path to a multi-channel interactive ecosystem which puts digital technology at the heart of every campaign. With separate chapters on the remaking of marketing, the rise of the digital brand, conversion optimization, m-commerce, searchability in a multi-channel world and predictive marketing, Multi-Channel Marketing Ecosystems shows how marketers and brand managers can react positively to changes in consumer behaviour, building customer responses and loyalty via the full spectrum of digital media.

Human Work Interaction Design: Analysis and Interaction Design Methods for Pervasive and Smart Workplaces José Abdelnour-Nocera, Barbara Rita Baricelli, Arminda Lopes, Pedro Campos, Torkil Clemmensen, 2015-12-08 This book constitutes the thoroughly refereed post-conference proceedings of the 4th IFIP WG 13.6 Working Conference on Human Work Interaction Design, HWID 2015, held in London, UK, in June 2015. The 15 revised full papers presented were carefully selected for inclusion in this volume. The papers reflect many different areas and address many complex and diverse work domains, focusing on the integration of work analysis and interaction design methods for pervasive and smart workplaces. They are organized in the following sections: methodologies; environment, and specific contexts.

INTRODUCTION TO INFORMATION TECHNOLOGY RAJARAMAN, V., 2018-01-01 his textbook is designed to teach a first course in Information Technology (IT) to all undergraduate students. In view of the all-pervasive nature of IT in today's world a decision has been taken by many universities to introduce IT as a compulsory core course to all Bachelor's degree students regardless of their specialisation. This book is intended for such a course. The approach taken in this book is to emphasize the fundamental "Science" of Information Technology rather than a cook book of skills. Skills can be learnt easily by practice with a computer and by using instructions given in simple web lessons that have been cited in the References. The book defines Information Technology as the technology that is used to acquire, store, organize, process and disseminate processed data, namely, information. The unique aspect of the book is to examine processing all types of data: numbers, text, images, audio and video data. As IT is a rapidly changing field, we have taken the approach to emphasize reasonably stable, fundamental concepts on which the technology is built. A unique feature of the book is the discussion of topics such as image,

audio and video compression technologies from first principles. We have also described the latest technologies such as ‘e-wallets’ and ‘cloud computing’. The book is suitable for all Bachelor’s degree students in Science, Arts, Computer Applications, and Commerce. It is also useful for general reading to learn about IT and its latest trends. Those who are curious to know, the principles used to design jpg, mp3 and mpeg4 compression, the image formats—bmp, tiff, gif, png, and jpg, search engines, payment systems such as BHIM and Paytm, and cloud computing, to mention a few of the technologies discussed, will find this book useful. KEY FEATURES • Provides comprehensive coverage of all basic concepts of IT from first principles • Explains acquisition, compression, storage, organization, processing and dis-semination of multimedia data • Simple explanation of mp3, jpg, and mpeg4 compression • Explains how computer networks and the Internet work and their applications • Covers business data processing, World Wide Web, e-commerce, and IT laws • Discusses social impacts of IT and career opportunities in IT and IT enabled services • Designed for self-study with every chapter starting with learning objectives and concluding with a comprehensive summary and a large number of exercises.

Security and Privacy in Communication Networks Bhavani Thuraisingham, XiaoFeng Wang, Vinod Yegneswaran, 2016-01-23 This volume constitutes the thoroughly refereed post-conference proceedings of the 11th International Conference on Security and Privacy in Communication Networks, SecureComm 2015, held in Dallas, TX, USA, in October 2015. The 29 regular and 10 poster papers presented were carefully reviewed and selected from 107 submissions. It also presents 9 papers accepted of the workshop on Applications and Techniques in Cyber Security, ATCS 2015. The papers are grouped in the following topics: mobile, system, and software security; cloud security; privacy and side channels; Web and network security; crypto, protocol, and model.

Security and Privacy in Communication Networks Xiaodong Lin, Ali Ghorbani, Kui Ren, Sencun Zhu, Aiqing Zhang, 2018-04-21 This book constitutes the thoroughly refereed proceedings of the 13th International Conference on Security and Privacy in Communications Networks, SecureComm 2017, held in Niagara Falls, ON, Canada, in October 2017. The 31 revised regular papers and 15 short papers were carefully reviewed and selected from 105 submissions. The topics range from security and privacy in machine learning to differential privacy, which are currently hot research topics in cyber security research.

Technology Platform Innovations and Forthcoming Trends in Ubiquitous Learning Neto, Francisco Milton Mendes, 2013-09-30 It is hard to deny the ubiquity of web technologies used for educational tools; which have provided significant breakthroughs in learning environments. These innovations have contributed to the growing approach of computer-supported education. *Technology Platform Innovations and Forthcoming Trends in Ubiquitous Learning* overviews the opportunities provided by new technologies, applications, and research in the areas of ubiquitous learning and how those technologies can be successfully implemented. This publication is addressed to a wide audience of researchers, students, and

educators interested in a better comprehension of learning process requirements that are mediate by an assorted set of technology innovations.

Blockchain for 5G-Enabled IoT Sudeep Tanwar,2021-04-09 This book addresses one of the most overlooked practical, methodological, and moral questions in the journey to secure and handle the massive amount of data being generated from smart devices interactions: the integration of Blockchain with 5G-enabled IoT. After an overview, this book discusses open issues and challenges, which may hinder the growth of Blockchain technology. Then, this book presents a variety of perspectives on the most pressing questions in the field, such as: how IoT can connect billions of objects together; how the access control mechanisms in 5G-enabled industrial environment works; how to address the real-time and quality-of-service requirements for industrial applications; and how to ensure scalability and computing efficiency. Also, it includes a detailed discussions on the complexity of adoption of Blockchain for 5G-Enabled IoT and presents comparative case studies with respect to various performance evaluation metrics such as scalability, data management, standardization, interoperability and regulations, accessibility, human-factors engineering and interfaces, reliability, heterogeneity, and QoS requirements. This book acts as a professional guide for the practitioners in information security and related topics.

MANAGEMENT INFORMATION SYSTEMS BEST PRACTICES AND APPLICATIONS IN BUSINESS T.

ADIKESAVAN,2014-08-21 This substantially enriched second edition of the book includes evolution of IT applications in business over last five decades, to enable readers in understanding how IT offers newer solutions to modern business. It also discusses the knowledge management systems, various e-business models including e-marketing, Internet architecture and business technology management (BTM), where the focus is on strategic exploitation of IT. The unique arrangement of the contents in the book exposes the readers from the basics of IT (hardware, software and data) to all potential IT applications viz., data and transaction processing, MIS and EIS, business integration, CRM, business intelligence, decisions support systems, data warehouse and data mining, which bring tactical and strategic benefits to business. How technology benefits business, is the core of this book. The book also explains generic contributions of IT to business, enormity of business processes and management functions, what the business expects from the technology, systems audit and controls and software engineering and various techniques which lead to reliable, accurate, and secured deployment of IT applications in business. The text is highly practice oriented and is illustrated with a number of real-life examples and case studies. How IT resources are to be acquired and managed, are also discussed, in great detail. The book is designed for the postgraduate students pursuing business management and computer applications. Besides, the managers in all business verticals and functions will also find this book of immense use to them.

Advances in The Human Side of Service Engineering Tareq Z. Ahram,Waldemar Karwowski,2016-07-26 This book explores the different ways in which human-factors engineering influences organizations' and enterprises' well-being and

competitiveness. It covers a wealth of interrelated topics such as service engineering, service science, human-computer interaction, service usability, attitude and opinion assessment, servicescape design and evaluation, and training for service delivery. Further topics include service systems modeling, anthropology in service science, and customer experience, as well as ethical issues and the impact of an aging society. Based on the AHFE 2016 International Conference on The Human Side of Service Engineering, held on July 27-31, 2016, in Walt Disney World®, Florida, USA, the book provides readers with a comprehensive, general view of current research and challenges in the important field of service engineering. It also provides practical insights into the development of services for different kinds of organizations, including health care organizations, aviation providers, manpower allocation, hospitality and entertainment, as well as banking and financial institutions.

Cases on Instructional Design and Performance Outcomes in Medical Education Stefaniak, Jill, 2020-06-26 There is increasing attention placed on curricular programs in healthcare at the undergraduate, graduate, and continuing medical education levels. While medical institutions are beginning to hire instructional designers and medical educators to ensure adherence to instructional design principles, many medical educators have been appointed to lead instructional interventions based on their subject-matter expertise. Few have received formal instruction relative to designing instruction. Cases on Instructional Design and Performance Outcomes in Medical Education is an essential research publication that examines the design and delivery of education programs for healthcare professionals and provides them with the foundational knowledge needed to design effective instruction for a variety of audiences and learning contexts. Highlighting a wide range of topics such as healthcare, medical education, and online learning, this book is ideal for educators, physicians, nurses, allied health professionals, and academicians who are responsible for designing instructional activities.

MSEA 2023 Gaikar Vilas, Yuriy Shvets, Hrushikesh Mallick, 2023-07-21 The 2nd International Conference on Mathematical Statistics and Economic Analysis (MSEA 2023) was held virtually from 26-28 May 2023 in Nanjing, China. The conference was attended by researchers, teachers, students and engineers in the field of mathematical statistics and economic analysis. Through data statistics and analysis, we can quickly understand the pattern of economic development. This conference combines mathematical statistics and economic analysis, explores the relationship between the two, and provides a platform for experts and scholars in the fields of mathematical statistics and economic analysis to discuss related issues and exchange ideas. Therefore, we hope to create a forum for sharing research results and exploring future research directions, so that participants can learn about the latest research directions, contents and results of mathematical statistics and economic analysis; secondly, we hope that the conference can provide solutions to the major problems facing mathematical statistics and economic analysis, and create a space that encourages discussion and joint development of research, technological development and innovation.

Design and Covid-19 Rachel Cooper, Louise Mullagh, 2024-01-11 Presenting key examples and case studies of how design has responded to the pandemic, *Design and Covid-19* offers lessons and approaches to design for future resilience. Design has a key role to play in not only creating products to ensure safety from the pandemic, but also in the creation of complex systems, new technologies and physical environments that enable us to carry out our lives and protect populations in the future. *Design and Covid-19* identifies four key phases of the pandemic to examine how designers developed systems, services, communications and products as part of our response to the crisis, whether at an international, national or community level. Contributors report from a range of international contexts, including countries in Europe, Asia, Africa and Australasia, detailing how countries responded to the pandemic, introduced social distancing and lockdowns, developed test, track and trace systems, implemented new laws and how design and designers responded to the urgent new challenges that the pandemic created. They explore the adaptation of designs as communities searched for new ways of connecting and working through restrictions and social distancing measures, establishing local mutual aid groups and using social media to support each other through the pandemic, and go on to focus on recovery and resilience, analysing the deeper, systemic design response as industries emerge from lockdown. They explore the need to reflect on and investigate key issues in order to understand what we can learn personally, socially, economically and globally from this unprecedented crisis. Drawing upon the expertise of scholars from across the globe, *Design and Covid-19* explores a wide range of design disciplines to address the complex societal and global issues highlighted throughout the pandemic, and to inform new ways of building human and planetary wellbeing.

Extracting Innovations Martin J. Clifford, Robert K. Perrons, Saleem H. Ali, Tim A. Grice, 2018-06-13 This book considers the most contemporary innovations propelling the extractive industries forward while also creating new environmental and social challenges. The socio-ecological fabric of innovation in the extractive industries is considered through an integrative approach that brings together engineers, natural scientists, and social scientists—academics and practitioners—giving an empirically grounded and realistic evaluation of the innovations in this sector. It synthesizes a series of questions including:

Technological Challenges Carolina Machado, 2022-04-27 This book discusses and exchanges information on principles,

strategies, models, techniques, methodologies and applications of technological challenges in a digital era. It helps the reader to develop the skills required in the digital age and to acquire the knowledge and know-how necessary to drive their organizations to success. This book presents contributions that are exceptional in terms of theory and/or practice in the area of human resources management, technological management, digital age, creativity, technological innovation, organizational innovation, business analytics and flexibility.

Advances on Smart and Soft Computing Faisal Saeed, Tawfik Al-Hadhrami, Fathey Mohammed, Errais Mohammed, 2020-10-19 This book gathers high-quality papers presented at the First International Conference of Advanced Computing and Informatics (ICACIn 2020), held in Casablanca, Morocco, on April 12-13, 2020. It covers a range of topics, including artificial intelligence technologies and applications, big data analytics, smart computing, smart cities, Internet of things (IoT), data communication, cloud computing, machine learning algorithms, data stream management and analytics, deep learning, data mining applications, information retrieval, cloud computing platforms, parallel processing, natural language processing, predictive analytics, knowledge management approaches, information security, security in IoT, big data and cloud computing, high-performance computing and computational informatics.

Recent Advances in Internet of Things and Machine Learning Valentina E. Balas, Vijender Kumar Solanki, Raghvendra Kumar, 2022-02-14 This book covers a domain that is significantly impacted by the growth of soft computing. Internet of Things (IoT)-related applications are gaining much attention with more and more devices which are getting connected, and they become the potential components of some smart applications. Thus, a global enthusiasm has sparked over various domains such as health, agriculture, energy, security, and retail. So, in this book, the main objective is to capture this multifaceted nature of IoT and machine learning in one single place. According to the contribution of each chapter, the book also provides a future direction for IoT and machine learning research. The objectives of this book are to identify different issues, suggest feasible solutions to those identified issues, and enable researchers and practitioners from both academia and industry to interact with each other regarding emerging technologies related to IoT and machine learning. In this book, we look for novel chapters that recommend new methodologies, recent advancement, system architectures, and other solutions to prevail over the limitations of IoT and machine learning.
