Deeper level thinking...

All biotic and abiotic factors are interrelated. In nature you will find that if one factor is changed or removed, it impacts the availability of other resources within the system. Knowing this, give an example of what might happen given the following situations.

In the areas with the open space place either an **A** for abiotic or **B** for biotic to identify what the object is.

1. All of the rocks (___) are removed from a desert ecosystem, what would happen to the population of rock dwelling lizards (___) and in turn the animals which eat them.

2. A ten mile area of trees (___) is removed from the tropical rainforest. How will this affect the amount amount of water (___) and the amount of oxygen (___) in the area?
