Developing a Protocol for Observational Comparative Effectiveness

Research: A User's Guide Agency for Health Care Research and Quality (U.S.),2013-02-21 This User's Guide is a resource for investigators and stakeholders who develop and review observational comparative effectiveness research protocols. It explains how to 1 identify key considerations and best practices for research design 2 build a protocol based on these standards and best practices and 3 judge the adequacy and completeness of a protocol. Eleven chapters cover all aspects of research design including developing study objectives defining and refining study questions addressing the heterogeneity of treatment effect characterizing exposure selecting a comparator defining and measuring outcomes and identifying optimal data sources. Checklists of guidance and key considerations for protocols are provided at the end of each chapter. The User's Guide was created by researchers affiliated with AHRQ's Effective Health Care Program particularly those who participated in AHRQ's DEcIDE Developing Evidence to Inform Decisions About Effectiveness program. Chapters were subject to multiple internal and external independent reviews. More information please consult the Agency website www.effectivehealthcare.ahrq.gov

Breast Cancer Monica Castiglione,Martine J. Piccart,2009-07-11 Adjuvant treatment is administered prior to or as follow up to surgical procedures for breast cancer. Proven success in using medical therapies allowing for breast conserving procedures or reducing risk of occurrence. Although there has been much progress towards a cure including the introduction of new targeted therapies metastasizing cancer remains highly incurable Transgender Medicine Leonid Poretsky,Wylie C. Hembree,2019-02-22 Although transgender persons have been present in various societies throughout human history it is only during the last several years that they have become widely acknowledged in our society and their right to quality

medical care has been established In the United States endocrinologists have been providing hormonal therapy for transgender individuals for decades however until recently there has been only limited literature on this subject and non endocrine aspects of medical care for transgender individual have not been well addressed in the endocrine literature The goal of this volume is not only to address the latest in hormonal therapy for transgender individuals including pediatric and geriatric age groups but also to familiarize the reader with other aspects of transgender care including primary and surgical care fertility preservation and the management of HIV infection In addition to medical issues psychological social ethical and legal issues pertinent to transgender individuals add to the complexities of successful treatment of these patients A final chapter includes extensive additional resources for both transgender patients and providers Thus an endocrinologist providing care to a transgender person will be able to use this single resource to address most of the patient s needs While Transgender Medicine is intended primarily for endocrinologists this book will be also useful to primary care physicians surgeons providing gender confirming procedures mental health professionals participating in the care of transgender persons and medical residents and students
