Hell from the Heavens John Wukovits,2015-04-07 Looking toward the heavens, the destroyer crew saw what seemed to be the entire Japanese Air Force assembled directly above. Hell was about to be unleashed on them in the largest single-ship kamikaze attack of World War II. On April 16, 1945, the crewmen of the USS Laffey were battle hardened and prepared. They had engaged in combat off the Normandy coast in June 1944. They had been involved in three prior assaults of enemy positions in the Pacific-at Leyte and Lingayen in the Philippines and at Iwo Jima. They had seen kamikazes purposely crash

into other destroyers and cruisers in their unit and had seen firsthand the bloody results of those crazed tactics. But nothing could have prepared the crew for this moment-an eighty-minute ordeal in which the single small ship was targeted by no fewer than twenty-two Japanese suicide aircraft. By the time the unprecedented attack on the Laffey was finished, thirty-two sailors lay dead, more than seventy were wounded, and the ship was grievously damaged. Although she lay shrouded in smoke and fire for hours, the Laffey somehow survived, and the gutted American warship limped from Okinawa's shore for home, where the ship and crew would be feted as heroes. Using scores of personal interviews with survivors, the memoirs of crew members, and the sailors' wartime correspondence, historian and author John Wukovits breathes life into the story of this nearly forgotten historic event. The US Navy described the kamikaze attack on the Laffey as one of the great sea epics of the war. In *Hell from the Heavens*, the author makes the ordeal of the Laffey and her crew a story for the ages.

Rising Sun, Falling Skies Jeffrey Cox, 2014-03-20 Author Jeffrey Cox conducts a thorough and compelling investigation of the Java Sea Campaign, the first major sea battle of the Pacific War, which inflicted huge costs on the Allies and set the stage for Japan's rout across the Pacific and Indian oceans. Few events have ever shaken a country in the way that the Japanese attack on Pearl Harbor affected the United States. The Japanese forces then continued to overwhelm the Allies, attacking Malaya with its fortress of Singapore, and taking resource-rich islands in the Pacific in their own blitzkrieg offensive. Allied losses in these early months after America's entry into the war were great, and among the most devastating were those suffered during the Java Sea Campaign, where a small group of Americans, British, Dutch, and Australians were isolated in the Far East - directly in the path of the Japanese onslaught. It would be the first major sea battle of World War II in the Pacific.

Oak Cliff and the Missing Pieces Gregory M. Hasty, 2023-08-23 *Oak Cliff and the Missing Pieces* is the first book written about the area's history in over three decades. It not only captures the beginnings of the early settlement, it takes the reader beyond a century and a half of growth and tracks how the community has evolved. The book is unique in that it captures the history of West Dallas in conjunction with its Oak Cliff neighbor and how the two transformed together over time into what we see today. The collection of historical accounts and hundreds of photos identify individuals and places of prominence finally memorialized in one anthology. The narrative also takes readers through facts and stories that have been ignored or

concealed, revealing an authentic depiction of how the community was, at times, abused and neglected. Readers will enjoy this introspective examination of the area south and west of the Trinity and will once and for all put together the missing pieces of the storied land that has long been misunderstood. All proceeds from the sale of Oak Cliff and the Missing Pieces will go to benefit non-profit organizations in Oak Cliff and West Dallas.

A New English Dictionary on Historical Principles James Augustus Henry Murray, Sir William Alexander Craigie, Charles Talbut Onions, 1909

A History of the Laws of War: Volume 1 Alexander Gillespie, 2011-09-06 This unique new work of reference traces the origins of the modern laws of warfare from the earliest times to the present day. Relying on written records from as far back as 2400 BCE, and using sources ranging from the Bible to Security Council Resolutions, the author pieces together the history of a subject which is almost as old as civilisation itself. The author shows that as long as humanity has been waging wars it has also been trying to find ways of legitimising different forms of combatants and regulating the treatment of captives. This first book on warfare deals with the broad question of whether the patterns of dealing with combatants and captives have changed over the last 5,000 years, and if so, how? In terms of context, the first part of the book is about combatants and those who can 'lawfully' take part in combat. In many regards, this part of the first volume is a series of 'less than ideal' pathways. This is because in an ideal world there would be no combatants because there would be no fighting. Yet as a species we do not live in such a place or even anywhere near it, either historically or in contemporary times. This being so, a second-best alternative has been to attempt to control the size of military forces and, therefore, the bloodshed. This is also not the case by which humanity has worked over the previous centuries. Rather, the clear assumption for thousands of years has been that authorities are allowed to build the size of their armed forces as large as they wish. The restraints that have been applied are in terms of the quality and methods by which combatants are taken. The considerations pertain to questions of biology such as age and sex, geographical considerations such as nationality, and the multiple nuances of informal or formal combatants. These questions have also overlapped with ones of compulsion and whether citizens within a country can be compelled to fight without their consent. Accordingly, for the previous 3,000 years, the question has not been whether there should be a limit on the number of soldiers, but rather who is or is not a lawful combatant. It has rarely been a question of numbers. It has been, and remains, one of type. The second part of this book is about people, typically combatants, captured in battle. It is about what happens to their status as prisoners, about the possibilities of torture, assistance if they are wounded and what happens to their remains should they be killed and their bodies fall into enemy hands. The theme that ties all of these considerations together is that all of the acts befall those who are, to one degree or another, captives of their enemies. As such, they are no longer masters of their own fate. As a work of reference this first volume, as part of a set of three, is unrivalled, and will be of immense benefit to scholars and practitioners researching and

advising on the laws of warfare. It also tells a story which throws fascinating new light on the history of international law and on the history of warfare itself.

Participatory Knowledge Charlotte A. Lerg, Johan Östling, Jana Weiß, 2022-10-24 With concepts of participation discussed in multiple disciplines from media studies to anthropology, from political sciences to sociology, the first issue of the new yearbook History of Intellectual Culture (HIC) dedicates a thematic section to the way knowledge can and arguably must be conceptualized as participatory. Introducing and exploring participatory knowledge, the volume aims to draw attention to the potential of looking at knowledge formation and circulation through a new lens and to open a dialogue about how and what concepts and theories of participation can contribute to the history of knowledge. By asking who gets to participate in defining what counts as knowledge and in deciding whose knowledge is circulated, modes of participation enter into the examination of knowledge on various levels and within multiple cultural contexts. The articles in this volume attest to the great variety of approaches, contexts, and interpretations of participatory knowledge, from the sociological projects of the Frankfurt School to the Uppsala-based Institute for Race Biology, from the Argentinian National Folklore Survey to current hashtag activism and Covid-19-archive projects. HIC sees knowledge as rooted in social and political structures, determined by modes of transfer and produced in collaborative processes. The notion of participatory knowledge highlights in a compelling way how knowledge is rooted in cultural practices and social configurations.
